SUBSIDENCE 2007

University of Wollongong 26-27 November 2007

Mine Subsidence: A Community Issue

A conference jointly convened by the Mine Subsidence Technological Society and the Wollongong Branch of the Australasian Institute of Mining and Metallurgy. This conference is the 7th in a series of triennial conferences that brings together operators, researchers, designers, regulators, subsidence engineers, mining engineers, community members and all those with an interest in mine subsidence and its potential impacts. The aim is to promote greater understanding amongst all parties interested in mine subsidence, with emphasis on 6 key areas:

- **Community consultation in mine planning**
 - **Managing subsidence impacts**
 - **Case Studies**
 - **Stability of man-made structures**
- **Ecological considerations for underground mining**
- **Mining impacts on groundwater and surface water**
